Gain Professional Linux Certifications

LFCS

**Linux Foundation Certified
SysAdmin**

RHCSA

**Red Hat Certified System
Administrator**

Module Overview

Linux Foundation and LFCS Certification

Red Hat RHCSA

Lab Environment

Pluralsight Courses

Course Contents

Linux Foundation and LFCS

Linux Foundation

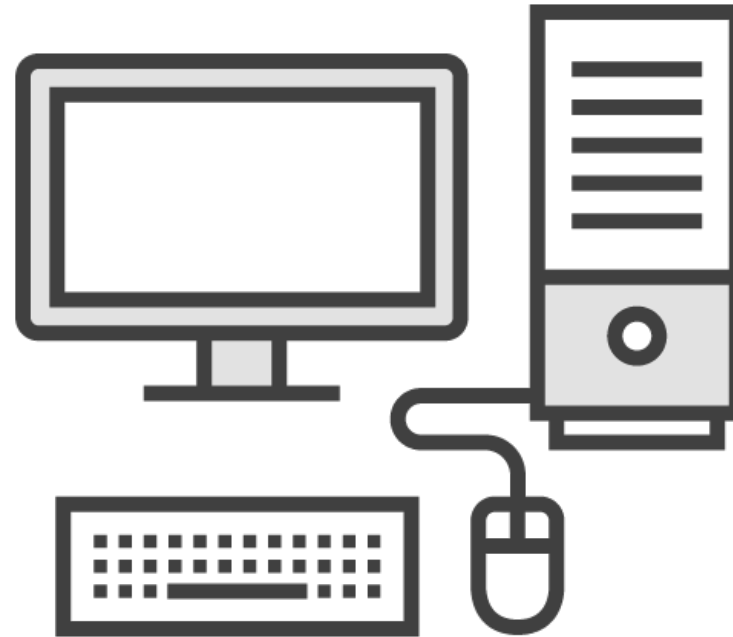

The Linux Foundation is a non-profit consortium dedicated to fostering the growth of Linux and was founded in 2000

LFCS

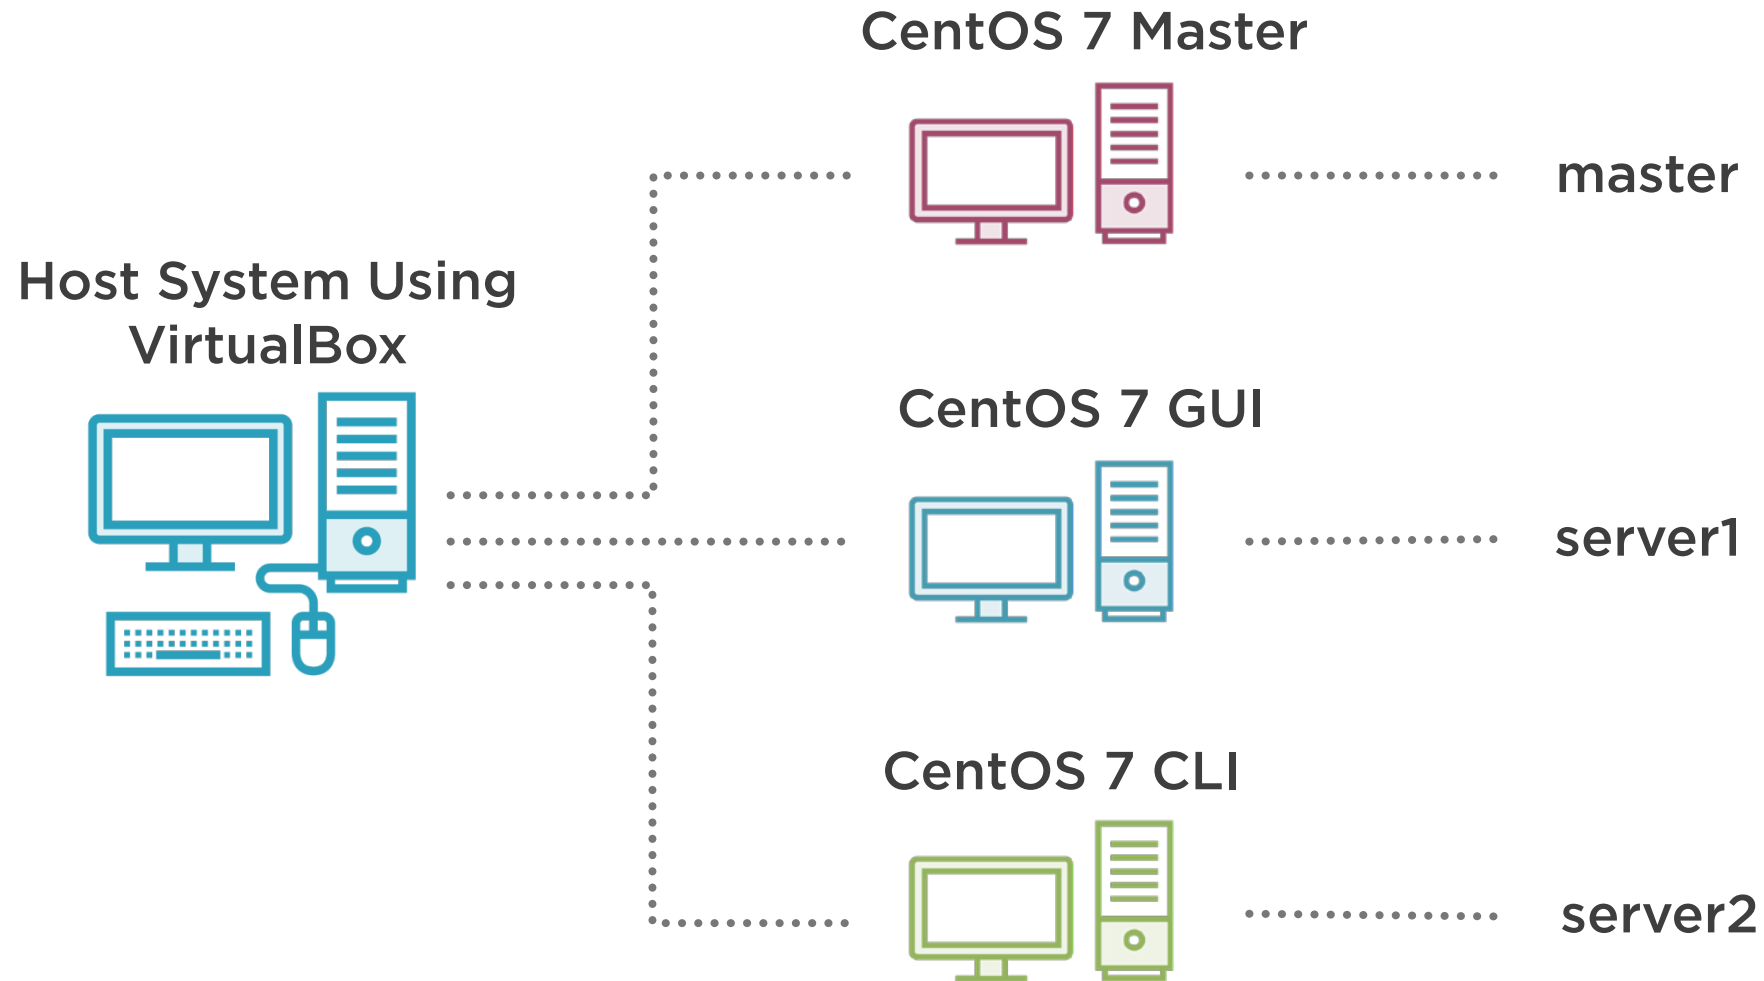

Linux Foundation Certified SysAdmin. Exam is a live exam taken on CentOS 7, openSUSE 13.1 or Ubuntu 14.04. The exam lasts for 2 hours

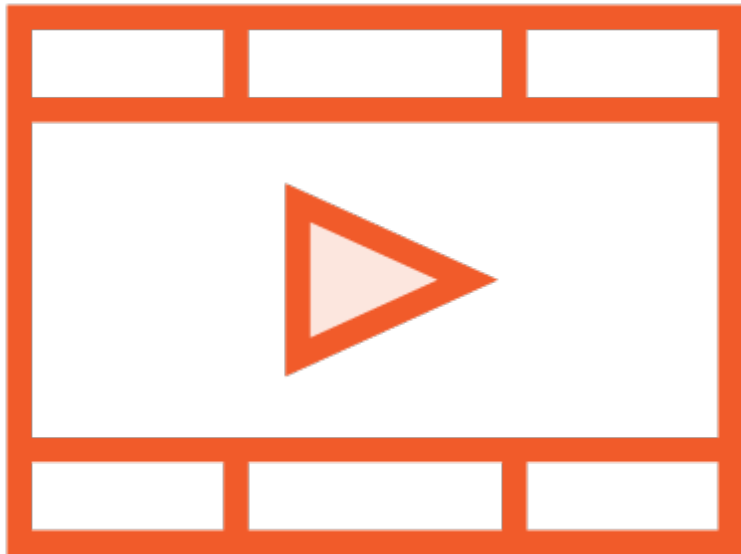

Course uses CentOS
Maps also to RHCSA
Similarly exam style

Lab Environment

LFCS: Linux Essentials

LFCS: Linux Operation Essentials

LFCS: Linux User and Groups Management

LFCS: Linux Storage Management

LFCS: Linux Networking

LFCS: Linux Service Management

LFCS: Linux Virtualization Management

LFCS: Linux Essentials

Installing CentOS7

Working on CLI
Reading Files

Using Vi
Piping and
Redirection

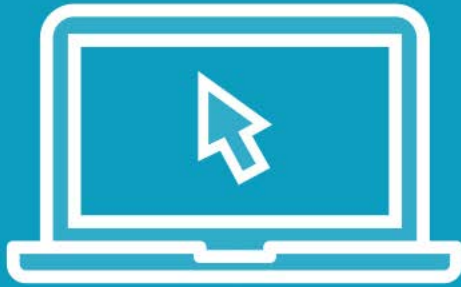

Help and
Archiving

Permission and
root Access

SSH and Screen

Demo

Well, how will you learn!

Partly by slides

The main points and summaries will be in slide form

Mainly you will learn from demos and hands-on practice

Let's take a quick look at using the Linux command line

Summary

Certifications

What we cover and how
you can be certified

Lab Environment

VirtualBox and CentOS
7.2

How You Learn

Lots of demos and work
along with them

Next up: Installing CentOS 7
